## NORTHTECH AIR FLOW

NORTHTECH AIR FLOW™ is a moisturizer with an integrated high flow generator.

NORTHTECH AIR FLOW™ is developed for the treatment of the patients that breathe spontaneously and for those that will benefit from getting oxygen moisturized and heated in high flow.

Optimal oxygenation is intended.

Flow, depending on the patient's interface, can be between 2-60L/min.

NORTHTECH AIR FLOW™ provides oxygen heated and moisturized in high flow.

It has an interface easy to use.

**It has to be used under the observation of medical professionals.**

Configurable heat and flow settings

- Three heat level (37,34,31° C) helps access to the comfort and compatibility
- Integrated flow generator provides a wide flow range like 2-60L/min.No need for chairside air support .
- Optimum Flow+Nose Cannula
- Soft,flexible tips
- Large-bore design reduces gas spraying
- It is designed for simple setup,usage and cleaning.
- Subsidiary screen helps setting up and troubleshooting.
- Spiral respiration tube
- 2-in-1 tube can be connected to both adults and kids.
- Integrated heat sensor.
- No need for external prob,cable or adaptor .
- Compatible with all interfaces.

## NORTHTECH AIR FLOW
