

# NORTHTECH OXYGEN CONCENTRATOR

## I. SUMMARY

Clinical studies documented that in terms of treatment, oxygen concentrators are equivalent to other types of oxygen provider systems. Oxygen concentrators are designed for individual usage at homes. This device electrically enhances oxygen by separating from the room air. It provides dense oxygen to the patient with a nasal cannula.

**THIS DEVICE MUST BE USED BY MEDICAL PROFESSIONALS UNDER OBSERVATION AND SUGGESTION.**

## II. DEVICE FEATURES

- Durable, reliable, fully plastic external layer
- Intelligible information screen with easy usage
- Emergency valve for use in case of emergency situations
- Alarms for preventing treatment deprivations
- Low oxygen level alarm function
- 4 locked tyres, easing the device to be carried for any reason
- Hot-plug feature for easily changing the accessories and filters to be used with device
- Integrated sensors for not to mire down the treatment and for the safety of recommended oxygen treatment
